### Objectives, financial situation, and needs

This product is designed for individuals who:

- Want access to a credit facility linked to their everyday transaction account to help manage unexpected bills, purchases, or temporary cash shortfalls—while avoiding overdrawn account fees.
- Receive regular income and are able to repay borrowed amounts but may not have sufficient savings or prefer not to use their savings for short-term expenses.
- Are seeking a flexible alternative to a credit card or personal loan—one that provides access to funds when needed and only incurs interest on the amount actually used.

### Consistency between target market and the product

This product is likely to be consistent with the likely objectives, financial situation and needs of the class of customers in the target market. This is based on an analysis of the key terms, features and attributes of the product and a finding that these are consistent with the identified class of customers.

The overdraft is suitable for those who are looking for easy access to funds as and when they need rather than have a loan over a longer period of time. They want the flexibility of having access to a revolving facility without having the need to keep re-applying for a loan.
